

The Grapevine Garden Club, in partnership with the Grapevine Parks & Recreation Department, is proud to announce plans to build a greenhouse in the Grapevine Botanical Gardens.

The Garden Club and PARD are committed to educating and inspiring the community about plants, wildlife, and our natural resources.

We believe a greenhouse will provide opportunities to expand the Gardens' educational classes by creating a no-season growing environment. It will provide a living laboratory for hands-on lessons in plant propagation, floriculture, container gardening, fertilization, transplanting, and soil preparation.

Additionally, the docent program will be extended to volunteers who want to "get their hands dirty" working in the greenhouse.

Challenged individuals can benefit from horticultural therapy in the facility. The greenhouse will also serve as a center to grow a wider

variety of plants for the Gardens and special civic events.

The proposed 52 ft. x 72 ft. aluminum frame greenhouse will have a 22 ft. x 24 ft. head house for potting and tool storage. It will have strong polycarbonate adjustable roof and side windows.

Temperature and ventilation will be automatically regulated with energy efficient environmental controls and shade system. It will have multiple irrigation zones including mist, drip, and overhead watering.

The facility will be landscaped to blend into the natural setting of the Gardens and be accessible to everyone. It will be located across the creek, in the north east corner of the Botanical Gardens.

Every garden needs sun, water and nutrients to help it grow. In the same way, the Grapevine Botanical Gardens Greenhouse Project needs the generosity and support of friends.

The estimated cost of the project is \$150,000. The money will be raised by your contribution, matching funds and grants. We invite you to participate in this growth with your tax-deductible contribution.

Donations may be made "In Memory of" or "In Honor of" friends or loved ones.

All donations over \$500 will be permanently recognized in the garden.

*"With your help, the dream will become a reality."*

“The greenhouse will be an asset to the Botanical Gardens for generations to come!”

*William D. Tate,  
Grapevine Mayor*

“The greenhouse will serve many purposes in the Grapevine Botanical Gardens. First, as a laboratory for growing plants, and secondly, as a horticulture learning center for our docents and volunteers, who in turn will educate and enlighten groups touring the Gardens.”

*C. Shane Wilbanks,  
Grapevine Mayor Pro Tem*

“The addition of the greenhouse will heighten the experience of nature and the beauty of the Botanical Gardens at Heritage Park.”

*Doug Evans,  
Grapevine PARD Director*

“The greenhouse will provide additional educational and volunteer opportunities for everyone in the community.”

*Lisa Adams Grove,  
Grapevine Botanical Gardens  
Horticulturist*

“The Educational Pavilion will be a wonderful benefit to future generations of young people.”  
*Edith Pewitt, Grapevine Garden Club  
Honorary Greenhouse Chairperson*
